**24-9 EDR—ECONOMIC DEVELOPMENT RATE SCHEDULE**

24-10. EXTRA FACILITIES SCHEDULE

24-11. VGRE—VOLUNTARY GREEN/ RENEWABLE ENERGY SCHEDULE

24-12. NET METERING SERVICE

6. RATE

A. The monthly billing shall be as stated in the Rate Schedule applicable to the Customer. Under the NMS Rider, only the per kWh charge component billed for electricity delivered by the Customer is affected. The Customer will pay for all kWh delivered by the City to the Customer. If the Customer has delivered electricity to the City system, the City will provide for Customers to be credited in kilowatt hours valued at an amount per kilowatt hour equal to the sum of Delivery Service charges and Supply Service charges for Residential Customers, and the sum of the volumetric energy (kWh) components of the Delivery Service charges and Supply Service charges for non-Residential Customers for any excess energy production of their generating facility that exceeds the Customer's on-site consumption of kWh in a billing period. Excess kWh credits shall be credited to subsequent billing periods to offset a Customer's consumption in those billing periods. At the end of the calendar year, a Customer may request a payment from the City for any excess kWh credit. The payment will be calculated by multiplying the excess kWh credits by the Supply Service rate applicable to the Customer. The Customer-generator retains ownership of Renewable Energy Credits (REC) associated with electric energy produced and consumed by the Customer-generator.

B. *Supply Service Charge and Supply Service Rate – This charge shall be used at the end of an annualized billing period in a calculation to pay Net Energy Metering (“NEM”) customers who request payment for any regulatory defined and eligible excess kWh credits. The payment for residential customer accounts shall be calculated by multiplying the excess kWh credits by the Customer's Supply Service Charges based on a weighted average of the first block of the summer (June through September) and winter Supply Service Charges (October through May) in effect at the end of the Customer's Annualized Billing Period and the preceding 11 billing periods, excluding non-volumetric charges, such as the transmission capacity charge and/or demand charges. The payment for nonresidential customer accounts shall be calculated by multiplying the excess kWh credits by the Customer's Supply Service Charges that would otherwise be applicable at the end of the Customer's Annualized Billing Period. A Customer's Supply Service Charge or Supply Service rate shall be calculated using the utility's wholesale rate minus non-volumetric charges.*

9. FAILURE TO COMPLY

The City may disconnect the Customer Service from the City's electric system if the Customer fails to comply with any of the provisions of the NMS Rider, ~~as prescribed in Section 23.3.C above,~~ The City also retains the right to disconnect the Customer Generator if it interferes with the City's Service or is poses a safety risks to the City's electric system. The Customer shall also be responsible for all the penalties and costs caused by Customer's failure to comply with this Section.

## APPENDIX 1 - FEE SCHEDULE

### Section 9. Dates.

Introduction: April 24, 2017

Adoption (Proposed): May 8, 2017

Effective:

Year 1 - June 1, 2017

Year 2 – June 1, 2018

Year 3 – June 1, 2019
