Higher income limits apply to families with more than eight persons, although they are not included in the printed State lists because of space limitations. The lower income limits for families larger than eight persons are determined by adding 6.25 percent of the four-person income limit base to the eight-person limit for each person in excess of eight. For very low-income limits, 8 percent of the four-person base is added to the eight-person limit for each person in excess of eight (e.g., the nine-person very low limit equals 1.4 (1.32 + .08) times the four-person limit.) The limits developed by the use of these factors are to be rounded to the nearest \$50.
