Solid Waste Guidelines

Solid waste collection is a critical and essential job as part of the Coronavirus (COVID-19) pandemic response. You can help protect the health of the men and women who collect your trash and recycling during this vital time. The virus may survive for up to 24 hours on cardboard and two to three days on plastic. With a few simple steps, you can protect sanitation workers by reducing the possibility of coming into contact with potentially contaminated items.

GARBAGE

- Make sure all your trash is inside a closed plastic bag. All materials must fit inside the provided container, with the lid closed. Crews will not collect items placed on the sidewalk; you must schedule a Bulk Collection for these items.
- Place containers out by 7 am on your scheduled collection day, no less than 3 ft. from all other objects, such as poles, other containers, and vehicles, with the lid opening toward the street.
- Because the Coronavirus may survive up to 24 hours on cardboard and 2- 3 days on plastic, wash your hands before putting your waste containers out for collection. Sanitize or wipe handles and lids to further reduce exposure. Thoroughly rewash your hands after placing your container curbside.

RECYCLING

- Tissues, paper towels, wipes, masks, latex gloves, or any other sanitary or cleaning materials used to protect you from the Coronavirus should NOT go into recycling carts or bins. (These items are never recyclable.) RECYCLED MATERIALS ARE OFTEN HANDLED BY WORKERS WHEN SORTED LATER.
- Break down large cardboard boxes and cut them apart, if needed, to fit inside your recycling container. All recyclables must fit inside the provided recycling container.
- Empty, rinse, and dry your bottles, cans, and other containers before you recycle them.
- Food and liquids never belong in recycling.
- Recyclable items should be loose in the recycling cart. Plastic grocery bags are NOT allowed. Please recycle grocery bags at your local grocery stores.

Visit the City's website to check your pick-up schedule, set up reminders, schedule bulk collections, determine what is or is not recyclable, and much more! Go to www.CityofMilford.com and click "Wondering What Goes Where?".
